# NARCISSI FOR OUR SPRING GARDEN

### GIANT-FLOWERING TULIPS

(Darwin, Cottage, and Breeder)

This classification contains the groups formerly classified as DARWIN, COTTAGE, and BREEDER. As there has been extensive interbreeding of these three classes, confusion has existed even among the best informed, and it seems to us useless to maintain class distinction any longer. In revising our 1946 list, we have eliminated many varieties and are listing newer varieties which we believe are a great improvement over the more common types. Their flowers are larger, stems longer and better, and the colors more striking and outstanding.

**ADVANCE**—32-inch. Cottage. One of the finest of the newer sorts with larger flowers, longer and better stems. The large flowers are fiery scarlet with flush of rosy orange. 3 bulbs 45c; 12 for \$1.50.

**AFTERGLOW**—26-inch. Darwin. Soft apricot orange shading to salmon at edge of petals. Very beautiful and long lasting. 3 bulbs 45c; 12 for \$1.50.

**ALBINO**—20-inch. Cottage. The best white for forcing. Large, snow white flowers of fine texture, soft yellow anthers. A good keeper. 3 bulbs 45c; 12 for \$1.50.

**ALICE KIETH**—26-inch. Breeder. Considered one of the best of the newer bronzy orange Breeders. Large, fragrant flowers of warm reddish orange, a good forcing variety. 3 bulbs 45c; 12 for \$1.50.

**BACCHUS**—30-inch. Breeder. A rich violet blue shade, with large flowers of elegant form; fine for cutting. 3 bulbs 45c; 12 for \$1.65.

Plant in a shaded spot, as in tree shade or on the north side of the house, and keep well watered (fine overhead sprinkling preferred). To prevent loss of bulbs when planted early or in cold or wet ground, start in peat in flats indoors in February or early spring; set 3 inches apart, slightly covered. Keep uniformly moist in warm, well-lighted place until 3 or 4 inches of growth develop, then plant in pots or in the garden, as desired.

## MALMO ORGANIC FERTILIZER

*The Organic Fertilizer for Every Garden Use*

The complete natural organic plant food for lawns, roses, shrubs, trees, flowers, vegetables, and general garden use. Very rich in necessary plant elements, containing the valuable "rare mineral elements." These rare elements are essential to plant health, good quality and maximum yield, and through vegetables and fruits to human life.

Malmo Organic is not a chemical, but an organic food that becomes available naturally through bacterial action as the plants can assimilate it. Its effects are lasting, building the soil as it fertilizes. The proportions of nitrogen, phosphate, and potash are high and blended to suit our conditions here. It proves most economical as less need be used than of many other fertilizers.

New lawns, 100 lbs. to 1,500 sq. ft.; established lawns, 100 lbs. to 3,000 sq. ft.; garden use, 1,000 lbs. per acre. Ton prices on request.
